

Green Thumb

Name _____

Opal told Gloria about her mother leaving and shared all her feelings. Gloria is compassionate and tells Opal that she may have special skills that came from her mother, such as a green thumb. Gloria suggests they plant something to see how it grows and test their green thumbs. To test Opal's patience, Gloria had her plant something without telling her what it was. Opal would just have to wait and see what it turned out to be.

Your teacher will give you some seeds to plant. There are three different types of flowers that will be grown in your classroom but no one will know which seeds they are getting. Through observation, you will need to guess what your flower is as it grows. In the box, add a drawing of your plant as it begins to flower.

My Observations

Plant Stem: _____

Rate of Growth: _____

Leaves: _____

Color of Buds: _____

I think my flower is: _____
