Professional Development Rubric	Yes	No/Not certain
Content provides strategies, lessons, and activities that can be used immediately in the classroom to have an impact on student learning and outcomes.		
Course content is well-researched and aligned with evidence-based practices and relevant content standards.		
Course content is written by an experienced classroom teacher, without the use of any artificial intelligence.		
Courses are taught by an experienced classroom teacher (with a master's degree or higher) who supports teachers as they implement effective instructional methods learned in the course.		
Assignments are graded using an established rubric with substantive feedback provided by the course instructor (not artificial intelligence).		
The course structure allows for sharing and discussing best practices with fellow teachers.		
Course credit is granted by a top-ranked nationally recognized university such as UC San Diego.		
Teachers receive a letter grade for the course documented on an official university transcript.
