## **Course Timeline**

Participants have one year to complete the course. Participants must spend a minimum of three weeks in this course.

## **Course Description**

Do you find that working with small reading and writing groups at the primary level is a less than ideal situation? Are students constantly interrupting your small group instruction for directions and clarifications? Let's face it — it is very unusual to find students in grades K-3 who can work independently in a consistent and successful manner. This online course introduces the Daily 5, a framework for structuring the time that students spend working on literacy. This literacy block routine is structured in such a way so that an entire classroom of students is engaged in deliberate, thoughtful, interesting, and fun activities which are focused on literacy while the teacher meets with small groups or individuals to provide targeted instruction. This course provides an in-depth look at the five core components of the Daily 5 — Read to Self, Work on Writing, Read to Someone, Word Work, and Listen to Reading. Participants will learn about the overall structure of the Daily 5, including how to introduce all five components using specific foundation lessons. Strategies will also be offered for differentiating and assessing each of the Daily 5 components, and participants will be given specific tips and suggestions for making each component a success in his/her own classroom. By the end of this course, teachers will feel very confident in implementing the Daily 5 approach to literacy in their primary grade classrooms.

Be sure to include the standard to which each focus lesson applies as well as your grade level. Each focus lesson should be described with enough detail so that another teacher can easily use it.

• Assignment #5

The culminating practicum is a three-step process. (1) In the first assignment, you were asked what goals you had and what you hoped to learn from the course. Think back to your original goals for this course. Write a minimum two-paragraph reflection specifically describing how what you learned can be used to help you reach those goal(s). (2) Next, write a minimum three-paragraph plan that specifically describes the ways in which you intend to implement a particular strategy you learned in this course into your own teaching situation. (3) Last, write a minimum two-paragraph reflection describing a student you have or have had in the past. Then, discuss how the strategies you learned in this course will specifically benefit that student as you put your plan into action.
